Opening date: December 5, 2019

Deadline: April 28, 2020

MSCA-RISE-2020

- **Objective:** to promote international and inter-sector collaboration through research and innovation staff exchanges, and sharing of knowledge and ideas from research to market (and vice-versa).
- **Scope:** RISE supports the development of partnerships (e.g. joint research and innovation activities) between academic and non-academic actors ***from different countries across Europe and beyond***, in the frameshift of clear R&I objectives and deliverables.
- **Target:** organisation staff
- **Call 2020 budget:** 80 MEur
- **RISE success rate (2018):** **26.5%**

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

RISE – Key notes

- Project built on **joint research and innovation activities** (at least three partners from different EU and associated countries)
- Project implemented through the **secondment of experienced staff (no recruitments, no student exchange)**
- Each staff member **seconded for a period of 1 to 12 months**
- The maximum size for a project is **540 person months**
- No minimum size explicitly defined for the project, but **substantial impact is expected**
- Maximum project duration is **4 years**
- **No Mobility Rule**

Non-European institutions in RISE actions

- Secondments **from Europe to non-European countries** are paid for
- Secondments **from most non-European countries*** to Europe are paid for, **except from high-income countries** (e.g. USA, Canada, Japan):
- **All countries are funded to participate in the project's networking/training events**

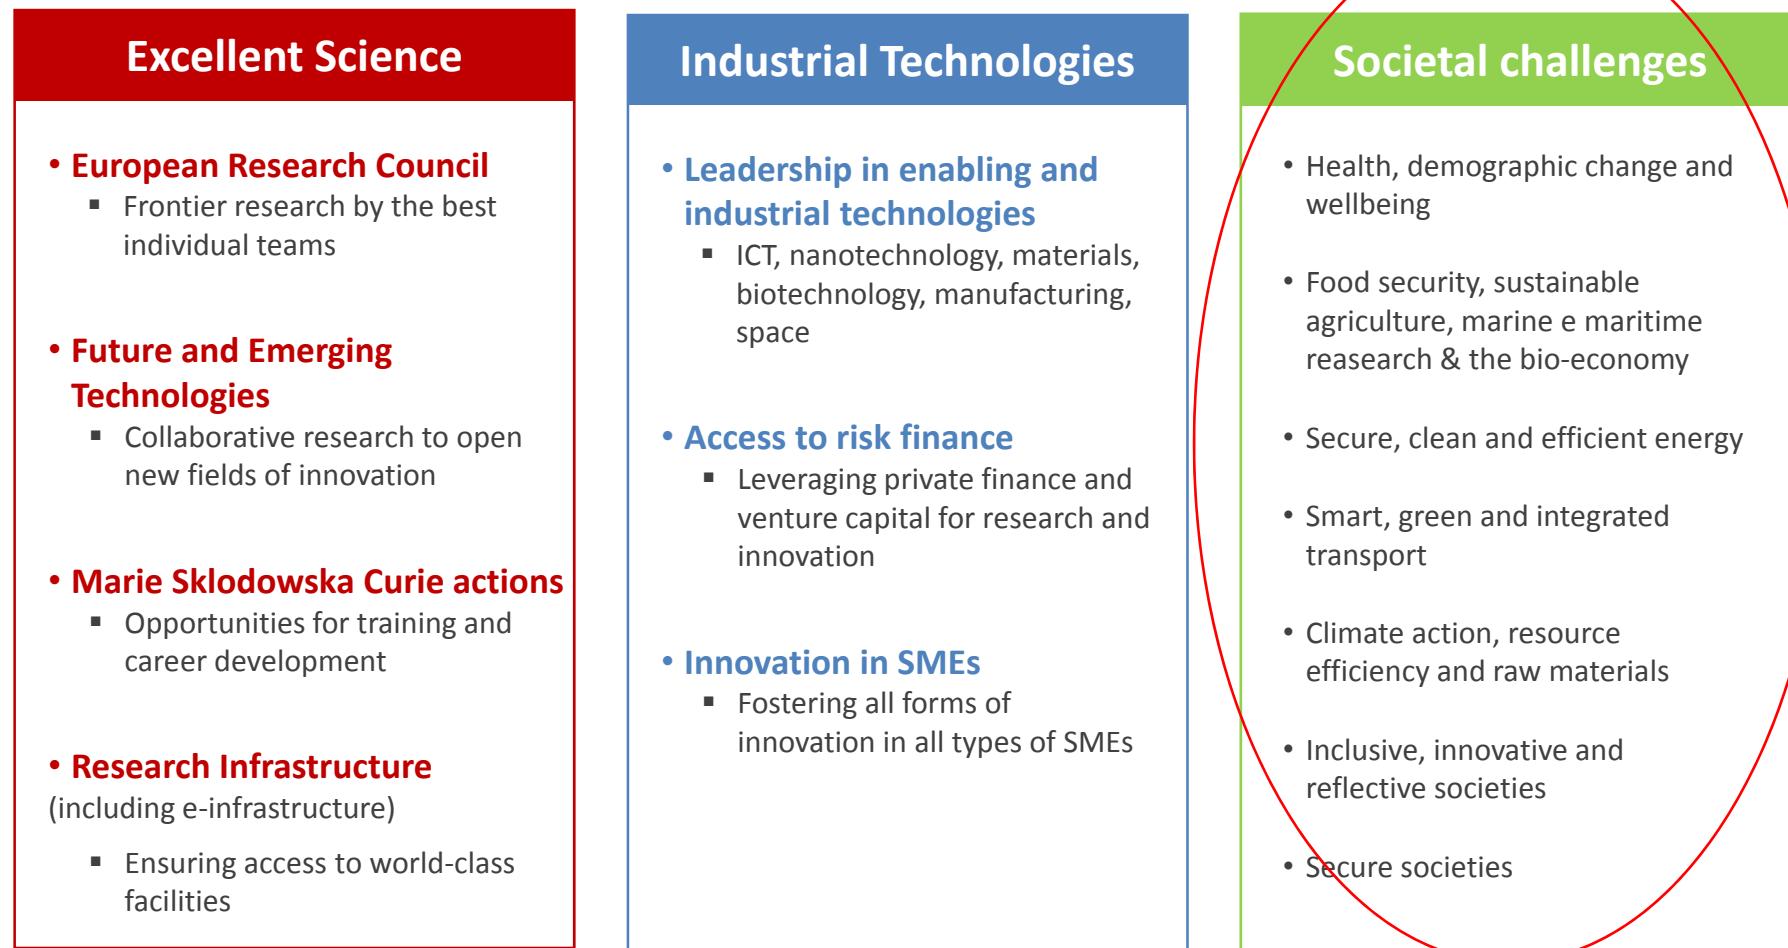

* Annex A to the General Work Programme provides a list of countries that can be fully financed by Horizon 2020

<u>SC1-BHC-36-2020: Micro- and nano-plastics in our environment: exposures and impacts on human health</u>	4 - 6 M€	4 - 6	7/04/2020

Applicability/Definition

1 A 'clinical study' ... any clinical research involving a substantial amount of work related to the observation of, data collection from, or diagnostic or therapeutic intervention on multiple or individual patients or study subjects. It includes but is not limited to clinical studies and clinical trials in the sense of the EU Clinical Trials Directive (2001/20/EC) and the Regulation (EU 536/2014).

- Broad, inclusive definition!

Clinical Studies

Why?

EU-funded clinical studies - Why?

- Critical mass (e.g. rare diseases, stratified approaches)
- Maximize recruitment through EU or international collaboration
- Providing evidence to impact clinical practice and improve patient care in various settings
- Increase robustness of data
- Provide multidisciplinary expertise
- Bringing innovations to patients and markets

WHAT TYPE OF PROJECTS WE FUND - 1

Projects selected for funding (2014-2018) under the '*Health, demographic change, and wellbeing*' (SC1) work programme part of Horizon 2020 **implement one or more clinical trials** according to the below distribution

Development phase	Pharmaceutical	ATMP	Grand Total
Phase 1	8	4	12
Phase 1 and Phase 2	11	6	18
Phase 2	18	12	30
Phase 2 and Phase 3	2		2
Phase 3	10	6	16
Phase 4	4		4
Grand Total	53	28	81

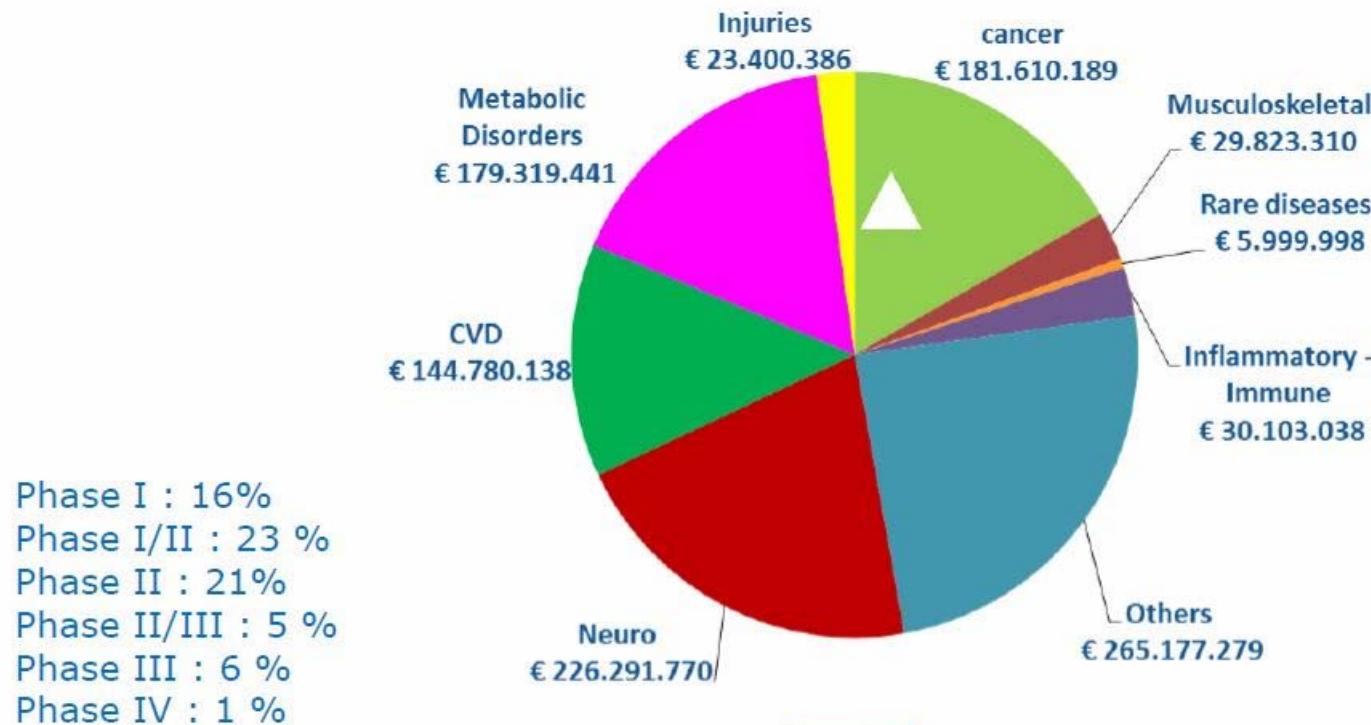

Clinical Studies

What?

Clinical studies - What?

> 340,000 patients recruited
165 Projects, 286 CTs , € 1.1 billion

1 Clinical study No. 1

1.1 Identifier

1.2.1 Study design

1.2.2 Primary and secondary endpoint(s)

1.2.3 Relevant guidance documents

1.3 Regulatory status and activities

1.3.1 Regulatory/ethics status

1.3.2 Scientific advice/protocol assistance

1.3.3 Qualification advice

1.4 Subjects/populations

1.5 Statistical analysis plan(ning) and power calculation

1.6 Cumulative safety and efficacy information

1.6.1 Cumulative safety information

1.6.2 Cumulative efficacy information

1.7 Conduct

1.7.1 Schedule for study conduct including timelines for key study milestones

1.7.2 Description of recruitment strategy

1.7.3 Description and assignment of intervention

1.7.4 Study management, study monitoring, data and sample management

1.7.5 Sponsor, coordinating centre(s) and committees

1.7.6 Study medication

1.7.7 Clinical centres

1.8 Orphan designation

1.9 'Unit costs per patient'

2 Clinical Study No. 2
etc

Additional support

„STARS“

The STARS project: Strengthening training of academia in regulatory sciences & supporting regulatory scientific advice

*The STARS proposal was selected under the **SC1-HCO-05-2018 topic: Strengthening regulatory sciences & supporting regulatory scientific advice** designed to strengthen regulatory knowledge among academic clinical researchers to ensure that innovations reach the patients in a timely and efficient manner.*

- **Budget:** ~EUR 2M
- **Duration:** 01/01/2019 - 31/12/2021 (36 months)
- **Type of action:** coordination and support action (CSA)
- **Co-ordinator:** BfArM (Germany) - Prof. Dr. med. Julia C. Stingl
- **Portuguese participant:** INFARMED - Autoridade Nacional do Medicamento e Produtos de Saúde IP

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

Digital Transformation of Health and Care

Declaration for delivering cross-border access to **genomic database**

1 million **genomes accessible** in the EU by 2022

Linking access to existing and future genomic database across the EU

Providing a sufficient scale for **new clinically impactful** associations in research

EUROPEAN EHR exchange format

Commission Recommendation to encourage and support MS to develop **interoperable and citizen centric** electronic health records systems

Horizon 2020 Work Programme for Research & Innovation 2018-2020

**Food security, sustainable agriculture and forestry, marine,
maritime and inland water research and the bioeconomy**

Highlights of the 2020 calls

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

Societal challenge 2 calls

Sustainable food security topics (2020)

From functional ecosystems to healthy food

- Biodiversity in action
- Livestock microbiome
- Integrated health approaches & alternatives to contentious pesticides
- New and emerging risks to plant health
- IPM
- Epidemiology of contagious animal diseases
- Genome and epigenome enabled breeding in terrestrial livestock

7 topics – 95 MC

Environment/ Climate-smart Food production and consumption

- Emerging challenges for soil management
- Forest soils

2 topics – 24 MC

Building capacities

- GenRes & pre-breeding
- Agri-Aqua labs

2 topics – 19 MC

Targeted international cooperation

- EU-Africa
 - ✓ Sustainable intensification
 - ✓ Diversifying revenue in rural Africa through bio-based solutions
- EU-China
 - ✓ Healthy soils for healthy food production

3 topics – 35 MC

For biomedical researchers

Type of actions :
RIA, IA, CSA

SFS-02-2020 Healthy terrestrial livestock microbial ecosystems for sustainable production

Background

- ✓ Interactions between animal host and microbiota → production efficiency, health and welfare of animals
- ✓ Interactions are highly dynamic and influenced by:
 - genetics
 - environment
 - nutrition/feeding
 - management
- ✓ Omics → understanding of biology, genetics, ecosystems (particularly important for non cultivable micro-organism)
- ✓ Research on the interplay between animals and their microbial ecosystems is needed to contribute to the improvement of sustainable livestock production

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

SFS-02-2020 Healthy terrestrial livestock microbial ecosystems for sustainable production

Requirements to keep in mind

Activities shall address:

- ✓ relevant microbial ecosystems of terrestrial livestock & their effects on:
 - production
 - health
 - welfare
- ✓ characterisation of microbial ecosystems
- ✓ assessment of variability within and between breeds in relation to variability of production systems and diet
- ✓ microbial behaviour
- ✓ microbial functions and interactions with host, environment and management practices, including feeding where relevant
- ✓ possible ways in which those ecosystems can be managed, including socio-economic aspects
- ✓ incorporation of data on microbial ecosystems in the models used to analyse phenotypic variability and to perform genetic evaluations

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

SFS-02-2020 Healthy terrestrial livestock microbial ecosystems for sustainable production

Requirements to keep in mind

- ✓ This topic is part of a microbiome cluster
- ✓ The activities shall address:
 - ✓ either ruminants, or monogastrics
 - ✓ GUT microbiome of pigs or poultry can be addressed only if the activities are complementary to projects selected under LC-SFS-03-2018 (e.g. MASTER, CIRCLES, HoloFood)
- ✓ Proposals may cover one or more: species & microbial ecosystems
- ✓ Single animal pathogens is not the focus of the topic
- ✓ Anti-microbial resistance can be included if it is not the main objective of the project (SFS-11-2018/2019)
- ✓ Encouraged to interact with:
 - relevant collaborative projects in Europe
 - international initiatives e.g. the rumen microbial genomics network of the Global Research Alliance on Agricultural Greenhouse gases.

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

SFS-10-2020: Epidemiology of non-EU-regulated contagious animal diseases: from integrated data collection to prioritisation (RIA)

Background

- ✓ Contagious livestock diseases impede the efficiency of animal production, lead to economic costs, poor animal welfare, and in case of certain diseases, have an impact on trade, consumer confidence and public health.
- ✓ Impact of non-regulated contagious diseases poorly known.
- ✓ Need to determine the prevalence, the burden of these diseases and to set up a framework to facilitate monitoring of the situation and enable improvements in risk assessments and prioritisation of disease control.

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

SFS-10-2020: Epidemiology of non-EU-regulated contagious animal diseases: from integrated data collection to prioritisation (RIA)

Requirements to keep in mind

Activities shall address:

- ✓ Harvesting of the knowledge carried in existing data streams on contagious, non-EU-regulated, animal diseases, including diseases with multiple pathogens and AMR.
- ✓ At least terrestrial livestock; aquaculture whenever relevant; investigate the feasibility of addressing relevant wildlife.
- ✓ Different production systems.
- ✓ Ways to validate, integrate and process data, including modelling, possibly generating additional useful information inferred from existing data and identifying new data that could be integrated in data streams.
- ✓ Identify and characterise data on diseases, context and consequences, the various components of data streams and assess opportunities and barriers to utilising or sharing information across countries and stakeholders throughout Europe.
- ✓ Relevant geospatial information and data on animal welfare and genetics, in so far as they can be connected to animal diseases, can be included in the planned activities.

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

SFS-10-2020: Epidemiology of non-EU-regulated contagious animal diseases: from integrated data collection to prioritisation (RIA)

- **Requirements to keep in mind**

- ✓ Explore the potential of precision farming and “big” data, cloud-based integrated data collection
- ✓ Test the feasibility and potential benefits of an integrated approach to knowledge extraction and decision support based on a specific risk scenario for a disease.
- ✓ Explore possible integration with farm management and information systems and (automated) decision support systems.
- ✓ Explore development or refinement of existing risk-based approaches and early warning systems.
- ✓ Provide a blueprint and a framework for the necessary changes to allow improved data utilisation to protect animal health and welfare, human health and the food chain in Europe.

- **Cross cutting aspects**

- ✓ MAA (producers, veterinarians and other professionals from animal production and the food chain, as appropriate, and decision makers)

Sezione Progettazione per la ricerca | cstf@unito.it

H2020 structure

Excellent Science

- European Research Council
 - Frontier research by the best individual teams
- Future and Emerging Technologies
 - Collaborative research to open new fields of innovation
- Marie Skłodowska Curie actions
 - Opportunities for training and career development
- Research Infrastructure (including e-infrastructure)
 - Ensuring access to world-class facilities

Industrial Technologies

- Leadership in enabling and industrial technologies
 - ICT, nanotechnology, materials, biotechnology, manufacturing, space
- Access to risk finance
 - Leveraging private finance and venture capital for research and innovation
- Innovation in SMEs
 - Fostering all forms of innovation in all types of SMEs

Societal challenges

- Health, demographic change and wellbeing
- Food security, sustainable agriculture, marine and maritime research & the bio-economy
- Secure, clean and efficient energy
- Smart, green and integrated transport
- Climate action, resource efficiency and raw materials
- Inclusive, innovative and reflective societies
- Secure societies

European Institute of Innovation and Technology (EIT)

Spreading Excellence and Widening Participation

Science with and for society

Joint Research Center (JRC)

NMBP in Horizon 2020

R&D and innovation in partnership with industry

- Activities primarily developed through relevant industrial roadmaps

Strengthening industrial capacities including SMEs, also through synergies with other funds, private and public

- Cross-cutting KETs, including pilot lines, demonstrators and test beds

Outcome and impact orientation, developing key technology building blocks and bringing them closer to the market

- Technology Readiness Level (TRLs) from 3-4 to 6-7 with emphasis on expected impact
- Business cases and exploitation strategies for industrialisation

Total budget under Horizon 2020: EUR 3.8 billion

DT 2020-NMBP-06-2020 Open Innovation Test Beds (OITB) for nano-pharmaceuticals production (IA)

- OITBs should upgrade or develop nanopharmaceutical (pilot) production facilities
- Offer services for the design and development of production processes, characterisation and quality control of nanopharmaceuticals
- Provide GMP certified batches of nanopharmaceuticals for late pre-clinical and clinical testing, in accordance with EU medical regulatory requirements
- Provide open access at fair conditions to SMEs, academia, etc.

- Start at TRL-4 and achieve TRL-7
- EU funding available ~34 M€ (3 topics share a budget of € 111,5 M€)
- EU Funding per project: 7 – 15 M€
- 2-Stage proposal procedure

Closing date Stage 1: 12 December 2019!

DT MBP-21-2020: Biological scaffolds for tissue regeneration and repair (RIA)

- Research on functional biomaterials for regenerative medicine
 - Targeted musculoskeletal delivery of cells or biologically active agents and innovative biomaterials for articular cartilage / disc, ligament and tendon repair
 - Stimulation of healing in chronic and infected wounds and ulcerative processes
 - Tissue regeneration in dental implants and/or dental root surgery
 - Implementation of innovative manufacturing technologies (e.g. 3D printing) for patient specific scaffolds
- Start at TRL-3 and achieve TRL-5
- Available EU funding budget: 17 M€
- EU Funding per project: 4 – 6 M€
- 2-Stage proposal procedure

Closing date Stage 1: 12 December 2019!

DT MBP-23-2020: Next generation Organ-on Chip (RIA-LS)

- Development of Organ-on-Chip (OoC) technologies able to mimic human organs and organ systems, involving technologies such as cell culturing, micro-fluidics, micro/nano sensors, imaging, actuators, 3D bioprinting, modelling & simulation, bio-informatics
- Demonstrator applications involving modelling, diagnosis and therapy of human diseases of high and yet unmet medical need
- Industrial development towards improved robustness, reliability, scalability, parallelisation and standardisation of tools and methods
- Expect reduction of the need for animal and clinical testing

- Start at TRL-3 and achieve TRL-5

- Available EU funding; 18 M€

EU Funding per project: 4 – 6 M€

- Note: topic is part of the 'Lump Sum Pilot'

- 2-Stage proposal procedure;

Closing date Stage 1: 12 December 2019!

European
Commission

IMI2 Call 18 – 6 topics

Translational safety:

- Central repository of digital pathology slides to support the development of artificial intelligence tools.

Big data, digital health, clinical trials and regulatory research:

- Health outcomes observatories – empower patients with tools to measure their outcomes in a standardised manner creating transparency of health outcomes.
- Improving patient access, understanding and adherence to healthcare information: an integrated digital health information project.

Oncology:

- Establishing international standards in the analysis of patient reported outcomes and health-related quality of life data in cancer clinical trials.

Facilitating the translation of advanced therapies to patients in Europe:

- Accelerating research & development for advanced therapy medicinal products.
- Supporting the development of engineered T cell.

IMI2 Call 18 – Key dates

- Topics texts are published on the IMI website
- Webinar topic presentations, SME dedicated webinar, Rules & Procedures:
[Presentations and list of participants available](#)
- Two-stages Call
- Call launch: 26 June 2019
- Deadline Short Proposal submission: 26 September 2019
- Submission through the EU Funding & Tenders Portal [SEDIA](#)
- Project start: Autumn 2020

Participation of UK entities

- until the UK leaves the EU, EU law continues to apply to and within the UK, when it comes to rights and obligations; this includes the eligibility of UK legal entities to fully participate and receive funding in Horizon 2020 actions
- eligibility criteria must be complied with for the entire duration of the grant
- **if the United Kingdom withdraws from the EU during the grant** period without concluding an agreement with the EU ensuring in particular that British applicants continue to be eligible, they will cease to be eligible to receive EU funding (while continuing, where possible, to participate) or be required to leave the project on the basis of Article 50 of the grant agreement

Participant portal – one-stop shop

The CDMRP fills research gaps by funding **high impact, high risk and high gain** projects that other agencies may not venture to fund.

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

Hallmarks of CDMRP:

- investing in groundbreaking research
- targeting critical gaps
- involving consumer advocates throughout the program cycle
- funding the full pipeline of research development, including basic, translational, and clinical research.
- fostering (or employing) collaboration and synergy.

General eligibility:

- Eligible Organizations: national and international organizations, including for-profit, non-profit, public, and private organizations, such as universities and colleges, hospitals, laboratories, and companies.

The CDMRP manages funds from the **United States Army Medical Research Acquisition Activity (USAMRAA)** striving to transform healthcare for Service Members and the American public through innovative and impactful research.

Direzione Ricerca e Terza Missione
Sezione Progettazione per la ricerca | cstf@unito.it

HOW TO APPLY TO CDMRP:

- 1) 1 step (pre-application): the PI needs to register to the **Electronic Biomedical Research Application Portal (EBRAP)** and to identify the Institution's Business Official (BO)
- 2) Submission of the 1 step proposal through **EBRAP**
- 3) Evaluation and feedback (email)
- 4) Preparation of the full proposal and submission through **Grants.gov** (compulsory BO validation)

Quick Start Guide

Introduction

This guide will help you to take your first steps with *Research Professional, the online database of research funding opportunities and research policy news.

Accessing the site

You can start browsing www.researchprofessional.com from any computer on campus at your university. To access the site from elsewhere, you will need to sign in with a personal account.

Searching for funding

Click on the Funding tab on the top toolbar. You have two ways of searching for funding:

- * *Simple Search:* Single box, type in your key words freely, with auto-suggester that presents disciplines, funders, award types and free text

A screenshot of the simple search interface. It shows a dark purple header with the word "Opportunities" and a "Search" button. Below the header is a single input field with a placeholder "Search" and a "Search" button to its right.

- * *Advanced Search:* Allows you to search with a combination criteria to build complex searches and fine tune the results.

A screenshot of the advanced search interface. It shows a header with "Choose an option to search by" and several buttons: "All text", "Discipline", "Award type", "Funder", "Closing date", "Award amount", and "More options". Below the header are three checkboxes: "Show me opportunities that are closed", "Match all criteria" (which is checked), and "Match any criteria". At the bottom is a red "Search" button.

Save a search

In the Funding section, saved items will be displayed in a list on the right-hand side of the page.

To save a search: Above the search box you will see the Save button, click on this to save your search criteria.

Create an email alert

Follow the steps to save a search. In the pop-up window choose the 'Save and Alert' button, this will create an email alert. You will receive an email every Friday containing any new funding opportunities that match your search criteria.
